2.2 Using the Makefile-s.....	2

1. CVS Repository

The repository is located on `cochise.uit.no`. You need a user account and password for checking out the source code. Contact the [project admin](#) to get those and further details about checking out.

2. Other set-up issues

To make deploying the source code as easy as possible, here are a few items to remember.

2.1. Environment variables

dsaf

2.2. Using the Makefile-s

sdf
